## Information about the trout in our Lakes.

The LWRA has a long history in working with the Ontario Ministry of Natural Resources (MNR) in stocking our lakes with various species of trout. Our challenge today is that detailed records of what happened do not seem to exist and the stocking of fish in our lakes has not taken place in several years.

Lake Trout

If we can provide evidence to the MNR that trout still exist in our lakes, our chances of re-stocking specific species will be greatly increased. This is where we need your help.

Your LWRA fish committee is asking you to provide us with any information about any trout that have been caught in any of our lakes recently and in the future so we can put together a proposal to the MNR in hopes they will re-consider stocking some trout back into our lakes. All we are looking for is the type of trout, which lake, and date. Any photo evidence would really help the cause.

Rainbow Trout

Speckled or Brook Trout

Your trout information can be e-mailed to [fishcommittee@lwra.net](mailto:fishcommittee@lwra.net), or phoned into **Scott Zies** at **(416) 219-1737**, or mailed to LWRA Fish Committee, c/o 21 Cottage Lane, RR#3, Huntsville, ON P1H 2J4.
